Special Event Application: Helpful Information

Permit Time Line

To ensure ample time for event logistics, Special Event Applications should be submitted as soon as possible and can be submitted as early as one year in advance of your proposed event date.

Minor Events that do NOT require any City support services are required to submit applications no later than 30 days prior to the proposed event date.

Major Events that require multiple road closures, moving routes and/or extensive City services are required to submit applications no later than 60 days prior to the proposed event date.

Throughout the review process, you will be notified if your event requires any additional information, permits, licenses or certificates. During this time, you will be allowed time to provide us with all pending documents (e.g. certificate of insurance, secondary permits, etc.).

Things to Consider

As you plan your event, be sure to take the items listed below into consideration...

- **Road Closures** - A road that is blocked from public use has the ability to impact traffic patterns miles around an event location. Will a suggested closure block access to a fire station or hospital? How will the closure affect public transportation and/or private businesses located throughout your suggested closure?
- **Alcohol** - Events including alcohol typically require trained servers, additional police presence and added licenses & fees. How will the presence of alcohol determine the amount of hired security and/or police presence?

- **Date & Venue** - Be sure to select at least three possible dates for your event to avoid planning for a venue that is unavailable. Research other popular events happening in the surrounding area on your date(s) to ensure your event isn't having to compete with an already established event to increase the likelihood of City staff availability.

Do I Really Need a Special Event Permit?

Any public event held in a location other than a designated assembly facility would require a Special Events permit. In most cases, these events would take place outdoors. Additionally, any outdoors activity on private property that will have an impact on traffic flow or the City's noise ordinance also requires a Special Events permit. Some examples of events requiring a permit are concerts, parades, festivals, a tent sale in a parking lot, private parties in backyards with amplified music, marathons and running events, bicycle races or tours.

Marketing

Be sure to have conditional approval from the City for your event before beginning any promotions, marketing efforts or advertising. Conditional approval may be made after your Special Event application has been submitted to the City of Spartanburg and initially screened by the Special Events department.

Special Event Application: Helpful Information

Fees

Specific venues such as Barnet Park, Duncan Park, Love Where You Live Park on S Spring St and Morgan Square all have rental fees in addition to this application. These parks have special rules, regulations and restrictions unique to each site. **To see a list of all City of Spartanburg park rental rates, visit cityofspartanburg.org/parks-and-recreation/reserve-a-space.*

Depending on the nature of your event, fees for City services may be required. These fees would cover costs of police, fire, solid waste pickup and other items. Some events may require off duty police officers to be in attendance that would cost the event applicant additional funds ranging from \$35 - 50 per officer per hour. These fees will be determined when the application is reviewed.

A deposit will be required to hold your event date and venue should the projected costs of providing City services exceed \$3,000. This will be determined after staff reviews the application.

Permit Process

After thoroughly developing your event plan, submit your completed application to the City of Spartanburg's Special Events department.

A member of the Special Events team will work with you to obtain all the required documents (insurance certificates, site plans, traffic needs, ABC permits, etc.) to ensure your event is successful. In certain cases, City staff will need to schedule an in-person meeting with the event applicant and other City staff departments that will be impacted.

INSURANCE COVERAGE FOR ALL VENDORS AND SERVICE PROVIDERS IN ATTENDANCE AT EVENT

In addition to insurance coverage by the coordinating agency/individual, **all vendors and service providers** for an event must also have the same levels of insurance as outlined in this document. This insurance coverage should name both you - the Event Organizer - and the City of Spartanburg, its officers, employees, and agents” as Additional Insured.

The Special Events Office must have all original insurance certificates no later than 30 days prior to the proposed start of the event. Failure to provide these certificates on time may result in the cancellation of the event.

Special Note: The Event Organizer may elect to purchase one insurance policy that covers all vendors and service providers in attendance at the event. (This would prevent the event organizer from the requirement of securing insurance certificates from numerous vendors and service providers - which in some cases, are secured at the last minute - and make it impossible to meet the 15 day timeline. Talk to your insurance provider about this option to see if it is feasible for you.

3) All servers must be at least 21 years of age with no current DUI charges or pending DUI hearings.

4) Volunteers serving alcohol cannot drink alcoholic beverages before or while on duty for the event.

5) The serving of alcoholic beverages cannot begin before the designated event start time or the time listed on the temporary permit. Sales must end at a minimum of 15 minutes before the conclusion of the event.

ATTACHMENT H - FOOD VENDOR GUIDELINES FOR SPECIAL EVENTS

Please be advised of the following rules, regulations, & information provided by the City of Spartanburg's Fire Prevention Office. All participants must abide by these guidelines. The items set forth here and within the body of the Codes are intended to ensure life safety for everyone attending an event, the property at the event, and the surrounding property or business's. Codes and Standards establish the minimum requirements.

1) All temporary structures shall be adequately secured to withstand the elements of the weather (regardless of weather conditions prior to the event).

Rapid changes in weather conditions can severely injure people in the vicinity of unsecured structures. A simple gust of wind can easily overturn most unsecured tents / canopies.

2) Temporary structures used for cooking or the assembly of people shall include a permanently affixed label with the flame resistant information of the structure.

Temporary structures that have not been treated with fire retardant chemicals burn very rapidly. Non-treated structures that have been used for assemblies have resulted in hundreds of deaths throughout history. Cooking under a canopy requires a flame retardant structure. The manufacture will sew into the tent fabric a label indicating the fire resistance. Without this, a certified document must be obtained from the manufacturer indicating the fire resistance of the tent and coinciding to a model or serial number on the structure.

3) Smoking is prohibited in City parks and facilities.

4) Absolutely no hay, straw, wood chips or other easily combustible materials shall be located under or within 20 feet of temporary structures or cooking areas.

5) Maintain a clear space of 5 feet on either side of fire hydrants and connections.

Maintaining access to fire hydrants increases the hydrant's visibility for the fire department and reduces the time it may take to access the hydrant. Hydrants may need to be accessed for emergency situations at the event or for surrounding properties.

6) Only outdoor rated drop cords will be used and shall be sized to your electrical load. All cables/cords crossing public areas or drives shall be covered with safety mats.

7) All vendors with cooking or food heat processing equipment shall have a 10 BC rated fire extinguisher or larger. Vendors utilizing deep fat frying shall have a type "K" extinguisher or a 40 BC rated extinguisher. The extinguisher must be less than 1 year old (as stamped by the manufacture) or serviced by a licensed fire protection company within the last 12 months.

8) All compressed gas cylinders shall be secured in place with rope or chain to maintain the cylinder in the upright position. No cylinders shall be stored or operated on their side. Protective collars must be in place and caps installed when will be in place when cylinders are not in use.

Compressed gas cylinders can be very dangerous if they are damaged (from a fall, collision, etc.). It is critical to make sure cylinders are secured in place and used in the correct manner. Maintaining protective caps on cylinders while not in use will reduce the likelihood of the unit being damaged as the result of a fall.
